

Ronald Diaz

Senior Mobile Architect - Logistics
gabriella07@example.net | +1-419-261-6261 | New Charles, Korea

SKILLS

Swift • Kotlin • iOS Development • Android Development • Mobile CI/CD • GitHub Actions • Bitrise • MVVM • Clean Architecture • Offline-first data sync • REST • GraphQL • Release Engineering / App Store automation • Automated Testing? releases? Performance Profiling

EXPERIENCE

Senior Mobile Architect - Logistics — LogiSwift Technologies

June 2024 – Present

Lead end-to-end mobile solutions for logistics platforms using Swift (iOS) and Kotlin (Android). Built and maintained mobile CI/CD pipelines (GitHub Actions, Bitrise), reducing release cycles by 50% and improving build reliability. Implemented offline-first data synchronization and secure credential handling, contributing to zero critical outages in 12 months.

Senior Mobile Engineer — TransRail Logistics

January 2022 – May 2024

Delivered native iOS and Android features for dispatch and tracking, integrating with REST/GraphQL backends. Cut crash rate by 35% and improved performance through profiling and memory management. Implemented release automation and feature flags to support faster, safer deployments.

Mobile Engineer — RapidFleet Systems

June 2020 – December 2021

Developed core mobile features for fleet management with Swift and Kotlin, delivering offline-first data sync and reliable dispatch flows. Shaped architecture with MVVM and Clean Architecture to improve testability and maintainability. Collaborated with backend teams to evolve APIs and integrate continuous delivery practices.

EDUCATION

Master of Science in Computer Science

Seoul National University

Graduated: 2016
