Matthew Ware

Junior Backend Developer (Healthcare)
ortegadaniel@example.com | 503-523-8106 | Buckmouth, Benin

SKILLS

Rust • Actix-web • PostgreSQL • Nix • SQLx • Docker • Git • REST APIs • JWT Authentication • Unit & Integration Testing • CI/CD • API Design

EXPERIENCE

Backend Engineer — HealthBridge Technologies
June 2024 – Present
Built a Rust backend with Actix-web supporting patient records, appointments, and authentication via a secure REST API. Integrated PostgreSQL with migrations and optimized queries, cutting average latency from 120ms to 85ms and boosting throughput. Managed dev environments with Nix and containerized services using Docker to ensure consistent builds across the team.

Software Engineer Intern — MediPulse Clinic
June 2023 – May 2024
Contributed to a Rust microservice with Actix-web for appointment scheduling, implementing CRUD for patient data. Wrote unit and integration tests, increasing test coverage from about 60% to 82%. Helped standardize development environments with Nix and documented CI workflows.

Junior Backend Developer — CareNet Solutions
July 2022 – June 2023
Assisted migration of legacy services to Rust + Actix-web and PostgreSQL, building scalable data access layers. Optimized SQL queries and introduced basic caching to improve response times. Participated in setting up Docker-based local development and contributed to Nix-based provisioning.

EDUCATION

B.S. in Computer Science
Buckmouth University
Graduated: 2022
